Enhanced NPI File

Current NPI Provider Count = 2,851,192

The Administrative Simplification provisions of the *Health Insurance Portability and Accountability Act of 1996 (HIPAA)* mandated the adoption of standard unique identifiers for health care providers and health plans. The purpose of these provisions is to improve the efficiency and effectiveness of the electronic transmission of health information. The Centers for Medicare & Medicaid Services (CMS) has developed the National Plan and Provider Enumeration System (NPPES) to assign these unique identifiers.*

NPPES developed the National Provider Identifier (NPI) to serve as an identifier for reimbursement for any provider or group that files insurance claims. In addition, the disclosure of the NPI by pharmaceutical and medical device organizations is required by the 2010 federal Patient Protection and Affordable Care Act (PPACA). The mandate to disclose NPI numbers is included in the law's Sunshine provisions, which require the electronic disclosure to the Department of Health & Human Services of any "payment or other transfer of value" given to a physician.

Much like the need for organizations to have state license and specialty information, Enhanced NPI is essential to your compliance initiatives. Our Enhanced NPI File is supported by clean, standardized, and USPS matched addresses and is ready for use within your organization. Output files may be customized to your specific needs.
